## **Household Cleaning (Ecosave, an Eco-Friendly Cleaning Powder)**

1. EcoSave powder can be used to wash your bowls, plates and other dishes clean without burning your hands as it's a 'green cleaning agent', which is chemical free (unlike chemical based cleaning agent that contains detergent residue)
2. You can keep your coffee pot and teapot free from stain and odor when you put 3 tablespoon of Ecosave powder into the pot with hot water
3. You can remove scorched marks or burned stains of aluminium-based cookware (not Teflon or enamel pot) by spreading Ecosave powder on top of the marks/stains, then add boiling water on it, wait awhile, rinse with clean water before wiping it clean.
4. You can clean the residue inside the thermos bottle with Ecosave powder by dissolving 50g into a cup of hot water, add it into the bottle, shake the bottle up and down, let it sit awhile, before pouring the water out.
5. EcoSave powder can be used to clean and remove the odor of all your stainless steel pots.
6. Ecosave powder can be placed in an open box to remove odor in a fridge. When added with warm water, it can be used to clean the fridge compartments.
7. Ecosave powder can be sprinkled onto trash or smelly area as it can act as a deodorant too
8. Ecosave powder can be used to clean the microwave oven inside out, kitchen hobs and hood and general kitchen utensils.
9. If you have a pet at home that urine on carpet or sofa, you can put some EcoSave powder on these areas to remove the urine odor and stain. If the urine is on concrete floor, you can sprinkle some EcoSave powder, rinse it with water and brush the floor clean.
10. You can sprinkle Ecosave powder on a wet cloth to scrub plastic parts of household appliances to good effect.

## **Other Uses of EcoSave Powder:**

1. Glass and ceramic products can be decontaminated with EcoSave powder mixed with water. To clean stubborn dirt, mix water and EcoSave powder to the ratio of 2 to 1 ratio.
2. You can add some EcoSave powder into a kettle & boil it with water to remove kettle stain.
3. If your silver color kitchenware loses its shine, mix 3 to 1 ratio of EcoSave powder to water proportion and use the mixture to wipe the kitchenware before rinsing it with water, and dry it in order to restore the shine so the kitchenware looks brand new again.
4. You can use a scrub to clean enamel-based kitchenware stubborn yellow stains with Ecosave powder when you mix the powder with a wet scrub or cloth.
5. If your carpet is accidentally stained with grease, wet it first, then put a handful of EcoSave powder, leave it overnight, then use a vacuum cleaner to suck and eliminate the EcoSave powder with grease.
6. To clean greasy kitchenware, let EcoSave powder immersed on the kitchenware for 30 minutes before wash for better effect.
7. To clean plastic container that has bad odor, you can use 1 teaspoon of EcoSave powder to be dissolved in 1000ml of water, then immersed it in the container for awhile, before cleaning it to remove the odor.
8. If you have a garden, you can use EcoSave powder mixed with water to water your flowers so that they can achieve full bloom faster
